**FOR IMMEDIATE RELEASE**

**PRO TECH TARGETS SAFETY PRODUCT DISTRIBUTORS  
AT NATIONAL SAFETY COUNCIL CONGRESS AND EXPO**

***Breakthrough Hearing Protection Product Being Demonstrated in Booth 2379***

FORT PIERCE, Fla., September 20, 2005 – Pro Tech Communications, Inc. (OTCBB:PCTU) will demonstrate the NoiseBuster® Electronic Noise Canceling (ENC) Earmuff at the National Safety Council Congress & Expo on Sept. 21-23 in the Orange County Convention Center in Orlando, Florida. Detailed product information is available at a newly launched website, [www.noisebuster.net](http://www.noisebuster.net).

Unlike traditional passive-only earmuffs and earplugs, the NoiseBuster ENC Earmuff provides more complete protection from a wider range of noise frequencies, particularly the low frequency noise generated by engines, motors and fans that is prevalent in many industrial settings. The passive component of the NoiseBuster ENC Earmuff has a very competitive Noise Reduction Rating (NRR) of 26dB (when worn over-the-head) and the ENC component provides as much as 20dB of added noise reduction within the low-frequency bandwidth of 20-800 Hz. The earmuff is priced at \$149.

The NoiseBuster's audio input feature also makes it an excellent choice for do-it-yourself users of lawnmowers and power tools who want to listen to music, as well as for motor sports fans when used in conjunction with scanners (devices that allow fans to hear the radio communications of race car drivers and pit crews).

The NoiseBuster ENC Earmuff is powered with a single AA battery that provides 65 hours of use. The unit is resistant to water, moisture, contaminants, mechanical shock and vibration. The product features soft, pliable ear cushions and an adjustable, extra-wide headband that can be worn over-the-head or behind-the-head. The unit is warrantied for one year.

To receive an evaluation unit, contact Joanna Lipper at 203-226-4447 ext. 3506 or [jlipper@nctgroupinc.com](mailto:jlipper@nctgroupinc.com).

**About Pro Tech Communications, Inc.**

Pro Tech Communications, Inc. engineers, designs and distributes audio and communications solutions and other products for business users, industrial users and consumers. The company's mission is to utilize its patented technologies to deliver the most advanced, feature-rich, durable and comfortable products at the most competitive price. Pro Tech's most recognized brands include the Apollo™ line of high-performance products for office and call center environments, the ProCom™ line of highly-durable headsets for drive-through restaurant personnel and the NoiseBuster noise canceling headphone for consumer audio and in-flight entertainment.
